Book Description

Title: Introductory Statistics

Author: Sheldon M. Ross

Publisher: Elservier Inc., Uk.

Edition: 3

Year: 2010

ISBN: 978-0-12-374388-6

R numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means an R code whose theory is explained in Section 2.3 of the book.

Contents

List of R Codes

Chapter 2

Describing Data Sets

R code Exa 2.1 Sick Leave

```
# Page No. 18
sick_days<-c(0,1,2,3,4,5,6,7,8,9)
frequency<-c(12,8,5,4,5,8,0,5,2,1)
leave<-data.frame(sick_days,frequency)
View(leave)
total_workers=sum(leave$frequency)
print(total_workers -leave[1,2])
print(sum(leave$frequency[4:6]))
print(sum(leave$frequency[7:10]))
```

R code Exa 2.2 Golf Tournament

```
# Page No. 23
winning_score<-c
   (270,271,272,274,275,276,277,278,279,280,281,282,283,284,285,286)

frequency<-c(1,1,1,1,2,4,5,3,6,4,3,1,2,1,1,1)
relative_frequency<-c(frequency/37)
```

```
golf<-data.frame(winning_score,frequency,relative_
   frequency)
View(golf)
barplot(relative_frequency, main="Relative Frequency
    Bar Graph", xlab="Winning Score",ylab = "
   Relative Frequency",names.arg = golf$winning_
   score,  col="darkred")
```

R code Exa 2.3 Birth Rate

```
# Page No. 35
class_intervals<-c
   (14.2,21.9,19,14.5,19.2,15.9,14.7,17.1,15.2,17.1,17.6,15.2,16,14.

breaks=seq(12.0,22.5,by=1.5)
class_intervals.cut=cut(class_intervals,breaks,right
   =FALSE)
class_intervals.freq=table(class_intervals.cut)
View(class_intervals.freq)
barplot(class_intervals.freq, main="Histogram", xlab
   ="Birth Rate",ylab="Frequency",col="purple",space
    = 0)
```

R code Exa 2.4 Blood Pressure

```
# Page No. 37
bloodpressure<-c("Less than 90","90-100","100-110","
   110-120","120-130","130-140","140-150","150-160",
   "160-170","170-180","180-190","190-200","2000-210
   ","210-220","220-230","230-240")
rf_30_40<-c
   (3,17,118,460,768,675,312,120,45,18,3,1,0,0,0,0)/
   2450
```

```
rf_50_60<-c(1,2,23,57,122,149,167,73,62,35,20,9,3,5,2,1)/731
BP<-c(90,100,110,120,130,140,150,160,170,180,190,200,210,220,230,240)

bp<-data.frame(bloodpressure,rf_30_40,rf_50_60)
View(bp)
plot(BP,rf_30_40, type="l", col="red", main="Aged 30-40->Red. Aged 50-60->Green.")
par(new=TRUE)
plot(BP,rf_50_60, type="l", col="green" )
```

R code Exa 2.5 Income

```
# Page No.44
income<-c(30941,25128,32151,26183,23512,32996,
          33276,42706,32779,42120,29596,28821,30001,25057,
          33404,28240,28280,29141,25579,25446,27744,36298,
          39244,30296,34071,22372,28936,25020,29771,30180,
          34334,39543,23941,36043,27711,26962,29406,25575,
          28731,31727,31319,25400,26894,27671,28551,24306,
          29567,32922,32677,23688,29923,30578)
d = sort(income)
n = 3
d2 = sapply(split(d, trunc(d/10^n)), function(x){
  before = trunc(x[1]/10^n)
  fmt = paste0("%0", n, "d")
  after = toString(sprintf(fmt, sort(x %% 10^n)))
  paste(before, after, sep = " | ")
})
```

```
for(x in d2){
  cat(x)
  cat("\n")
}
```

R code Exa 2.6 Minority

```
# Page No. 45
student_minority<-c(55.2, 47.8, 44.6, 64.2, 61.4,
    36.6, 28.2, 57.4, 41.3,44.6, 55.2, 39.6, 40.9,
    52.2, 63.3, 34.5, 30.8, 45.3)
stem(student_minority,scale=8, width=250)
```

R code Exa 2.7 Sporting Convention

```
# Page No. 46
weights_attendees<-c
    (102,103,103,104,107,110,111,112,112,113,116,119,121,122,124,124,

                              ,127,129,131,132,132,135,135,136,136,138,139,1

                              151,151,155,156,156,156,157,160,161,161,161,16

                              175,176,176,176,181,182,182,185,185,186,186,18

stem(weights_attendees,scale=2)
```

Chapter 3

Using Statistics to Summarize Data Sets

R code Exa 3.1 Fuel Efficiency

```
#  Page No. 73
fuel_efficiencies<-c(28.2, 28.3, 28.4, 28.5, 29.0)
print(mean(fuel_efficiencies))
```

R code Exa 3.2 Masters Golf Tournament

```
# Page No. 74
WinningScores<-c(280, 284, 280, 277, 282, 279, 285,
    281, 283, 278)
trans_data<-c(WinningScores-280)
View(trans_data)
